

# GeoBoard™

**GeoBoard™** is a decorative cement board used in both interior & exterior applications such as exterior rain-screens, facades, interior & exterior wall cladding, ceilings, soffits, trims, moulding, countertops, retail fixtures, planters and many specialty applications.

## FEATURES of GeoBoard™

- Natural color of Portland Cement
- Appealing variation in surface color and texture
- Accepts clear sealer, stain, paint and other masonry finish products
- Cost effective alternative to more expensive cladding systems
- Installs and fabricates easily using carpentry tools
- Customized shop drawings available

## BENEFITS of GeoBoard™

- **Mold/Fungus Resistant:** Does not support mold/fungus growth
- **Moisture Resistant:** Resistant to weather, freeze/thaw & standing water
- **Fire Resistant:** ASTM E84 / UL 723 = 0 Flamespread / 0 Smoke Developed
- **Termite/Vermin Resistant:** Provides no food value to insects/vermin
- **Impact & Abuse Resistant:** Made from durable Portland Cement
- **Acoustic Performance:** Density of 77lbs/ft<sup>3</sup>
- **Dimensionally Stable:** Minimal changes with temperature & moisture variations
- **Environmentally Friendly:**
  - Composed of post-industrial wood content
  - No added HCFC's, VOC's, formaldehyde or asbestos
  - Reduces materials on the job.

## GeoBoard™ Applications
